FOR IMMEDIATE RELEASE

**ENGENUITY SYSTEMS, INC. ANNOUNCES AVAILABILITY OF NEW WIRELESS
PRODUCTS IN NORTH AMERICA**

[Chicago, Illinois - January 23, 2006] – Engenuity Systems, Inc., the world's largest LONWORKS® and open systems product distributor, recently announced it will carry additional product lines from manufacturer Nico Technologies. Nico Technologies, based in Taiwan, is well known for its innovative lighting and audio visual (AV) control products throughout Asia. The majority of its products use the EIA 709.1 (LONTALK®) standard and several products have received the LONMARK® 3.3 certification. Engenuity will now offer the following Nico products to its customer base: Nico Web Panel PAD 5200L, 2.4GF receiver, FTT-10 to powerline router, 2.4G RF lux sensor, 2.4G RF temperature sensor, 2.4G RF temperature/humidity sensor, PWM florescent dimming adapter and handheld RF remote control.

The Nico Web Panel PAD 5200L is a Windows CE.NET platform with grab-and-go computing convenience. Its metallic aluminum control panel with its streamlined design uses an 8.4-inch touch screen for its operation and acts as a wireless connectivity device that functions as a compact, portable computer for mobile workers. It is designed to integrate into a home office automation system, entertainment system, lighting device and security system.

(MORE)

The 2.4 line of wireless products is compatible with LONWORKS networks and can be used in both commercial and home applications. The products' reduced installation costs, convenience and ease of installation serve as a solution in monitoring functions like temperature and humidity control. For more information about these or other Nico products, visit www.engenuity.com or contact one of its sales representatives at 480-782-5600.

About Nico

Nico has been offering LONWORKS and open systems products in the Asian market since 1999 and continues to revolutionize commercial and residential lighting and audio visual applications with its intuitive designs and hardware functionality. Its relationship with Engenuity Systems enables them to penetrate the North American channel as well.

About Engenuity Systems, Inc.

Engenuity Systems, Inc. is the world's largest distributor of LONWORKS-based products and related peripherals and is an active participant in LONMARK International. It has been supplying LONWORKS products to the industrial control market and building automation industry since 1994 and currently offers over 4000 products manufactured by more than 75 manufacturers. In addition, the company's president currently serves as the Chairman of the Board of Directors for LONMARK International, the industry's leading open systems trade organization. More information about the company's complete line of products can be found at www.engenuity.com, or contact Engenuity at (800) 375-3363, (480) 782-5600, or by email at info@engenuity.com.
